MACLAUL ALL COntracture of Muscle unspecified site
M62.49 Contracture of Muscle, unspecified site
Diagnostic Testing
The patient will be scheduled to undergo the following diagnostic tests, which are clinically necessary to form an effective treatment plan and confirm the initial diagnosis.
[] X-Ray to rule fracture, dislocation, or bone pathology
[] Cervical Spine [] Thoracic Spine [] Lumbar Spine
[] Cervical Spine [] Thoracic Spine [] Lumbar Spine [] R/L Shoulder [] R/L Knee [] R/L Ankle
Other:
[] MRI magnetic resonance imaging to rule out suspected disc macro trauma. MRI would be able to determine the size, location, and severity of disc involvement and confirm if there is a neuroforamiinal encroachment causing compression of nerve roots and/or spinal stenosis caused by herniated nucleus pulposis that may be compressing the spinal cord.
[/ Cervical Spine [] Thoracic Spine [] Lumbar Spine
Other:
[]PFNCS testing of the Cervical/Lumbar Spine with associated upper/lower extremities to confirm origin of pain; and to guide and facilitate Chiropractic Manipulative Therapy
